

OUR ENVIRONMENTAL POLICY

In times of globalisation, a company's environmental policy is becoming increasingly important. Environmental problems cross national borders and affect people as well as nature in the same way.

The dedicated responsibility of an internationally operating company must therefore not only be based on national guidelines, but also on the awareness of a respectful use of the natural resources of each habitat.

Our HUEHOCO GROUP takes this responsibility very seriously and sets standards with innovative plant technologies as well as the development of environmentally compatible coating materials and controlled processes.

FOR A COMMON FUTURE.

WE MAKE PRODUCTS PROUD

RESPECT, COURAGE AND DEDICATION

Through this vision and our corporate philosophy, HUEHOCO has been offering problem-oriented industrial solutions in the field of metal coating and processing for almost a full century.

We are proud to be able to combine the advantages of a family business with the competencies of a globally active group and thus offer our customers creative and complex solutions with sustainable benefits.

In over 30 industries and more than 40 countries business partners and customers appreciate our quality as well as fast, intelligent and economical solutions for their requirements.

OUR VALUE CHAIN IS YOUR ADVANTAGE!

With over 800 employees at 14 production sites worldwide, the HUEHOCO Group offers cross-sector system solutions thanks to the cooperation of all our companies.

The product portfolio ranges from the production of cold rolled steel, the development and production of various coating systems, the coil coating itself, to roll cutting and punching processes, as well as the production of geometrically complex punch-bend parts.

EVERYTHING FROM ONE GROUP

OUR VALUE CHAIN

COLD ROLLED STEEL

State-of-the-art technology and extensive knowledge in the processing of steel characterises HFP Bandstahl. On this basis, we offer you a wide range of cold-rolled steels of the highest quality. Benefit from attractive prices, great flexibility and high readiness to deliver.

PAINT DEVELOPMENT & PRODUCTION

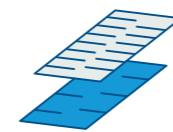

With 50 years of experience in the field of coating technology, SI-Coatings GmbH has firmly established itself in the market as a strong partner for numerous industries. The range of services includes customized solutions such as heat-sealing lacquers and adhesion promoters for thermoplastics and rubber as well as contract manufacturing according to customer specifications. We are happy to implement specific requirements for coatings, paints and adhesives.

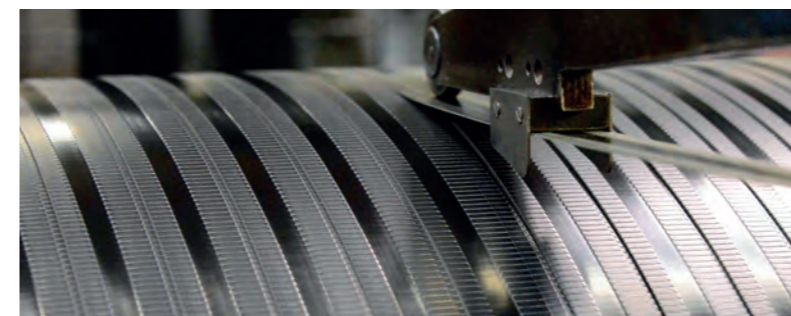

COIL COATING

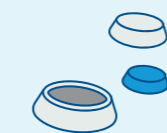

With its various production sites, HUEHOCO offers customers from all over the world high-quality solutions for technically demanding coatings in different areas. Whether adhesion promoter, decorative paint or rubber coating - everything comes from one competent source with more than 90 years of industry experience.

LANCED AND STAMPED CORE METAL INSERTS

Quality, flexible and customer-oriented - this is what the system solutions of the ACP Group stand for. For almost 20 years, the company has been a leading manufacturer of lanced and stamped core metal inserts. Due to the high quality, ACP metal strips have long been an established component in the sealing systems of major global producers.

PUNCHED & PUNCH-BEND PARTS

SIV Stanzbiegetechnik is your expert for forming technology and offers you a wide range of high-precision punched parts to geometrically complex punch-bend products. The range of processing includes both painted and bare sheets of stainless steel, aluminium and other metals.
